

14 Series Washer Reservoirs

High Density Polyethylene Construction (HDPE)

DESCRIPTION

Washer Bottles are made from High Density Polyethylene (HDPE). The 3, 4 and 6 Qt bottles have plastic spring caps with a metal spring. The 70 oz and 140 oz have snap caps. Bottles can easily be converted to using a remote fill spout. Additional pumps and fittings can be added to utilize one bottle for multiple spray locations.

All bottles* can use 12v or 24v pumps with spade terminals or Metri-Pack connection. Metri-Pack pumps mate with Delphi 1205 2641.

* Metri-Pack not available on the 14-311215, 14-321212
